

# Joint Council for Repatriation

*A Bi-Racial Coalition United for Justice for Persons of African Descent*

DEDICATED TO THE IDEALS OF ABRAHAM LINCOLN

Box 67, Sausalito, California

Dear Delegate to the Congress of Freedom:

In this confusing day of currents and cross-currents, patriots of experience and intelligence are looking, more and more, for a means to extricate their beloved America from the toils of, on the one hand, a suicidal policy of internationalism and, on the other, from certain domestic trends which seem to threaten the very existence of their people.

Failures of the past make it very clear that only a new outlook and program can hope for success for the future.

The reason for the failures are clearly seen. It is because the true facts regarding America--in particular, the economic ones--are simply not faced up to by American conservatives. To continue this policy of deliberate blindness means--inevitably means--continued failure.

These facts are not hard to see. They are known by every workman in the country. They are known by every politician. They are known by everybody. Yet they are not spoken of because they are so alarming. It is like the Emperor's New Clothes--everybody sees the facts but no one is willing to admit them.

America is internationalist because she has to be. Internationalism is the only answer, so far yet explored, which can solve America's vast problems of overproduction. Past internationalist wars have so greatly overexpanded America's productive plant that the only way for the politician to guarantee jobs for the voter is to indulge in gigantic, global handouts and to exist in a state of perpetual war. The problem is that simple.

The answer to internationalism, therefore, can only lie in a new approach to this terrific problem. To not answer this problem inevitably means continued internationalism, continued wars and continuous encroachment on the liberty of Americans by a militarized government. The facts must be faced or we must expect continued defeat and the gradual erosion of the American Republic.

Facing these facts, and others besides, we of the JCR herewith present for your consideration not the answer, but certainly a answer to the historic problem involved. Be prepared for a shock as you read the attached. Read it and think it over. For here is the most reasonable answer yet devised to the job of saving what is left of America. Do not be alarmed at the unorthodoxy of the ideas explored; they are unorthodox only in the context that they do not fit with many present political and social conceptions. But they are valid--fundamentally valid--because they do fit present facts and offer a solution to many of America's gravest problems.

Please let us hear of your reaction.

Sincerely, E.L. Anderson,  
member.

## Our Program:

(1) To inform colored persons of the existence of the JCR--a vital, aggressive movement dedicated to the genuine interests of the American-born African.

(2) To educate White persons to the true aims and aspirations of the Negro, and to so lessen racial friction.

(3) To seek to destroy the evil influence of radical, trouble-making, race-mixing, Communist-front organizations which masquerade as being for the benefit of the Negro, but which actually deliberately cause strife.

(4) To induce the U. S. Congress to pass legislation making African Repatriation a reality.

(5) To finance Repatriation and to provide liberal grants for Repatriates by curtailing foreign aid and needless military expenditures.

(6) To provide for the peaceful, rapid movement of Africans back to their motherland, Africa.
